

EPS

From twenty years ago the school EASD Serra i Abella is teaching artistic subjects, always with a commitment to quality and innovation in the public education of arts specialties.

One of the main objectives specified in Center's Educational Project is to promote the participation in the regional, national and European projects, and any project regarding acknowledge of Arts and Design, using new technologies and contributing to build a more opened society. The Center's Educational Project proposes:

- To give importance to the dialogue between teachers and students.
- To base the work on the students needs attending to diversity. To promote the exchange of experiences and results.
- To follow an active methodology, interdisciplinary, individualized and creative.
- To guide educational work with prospects for the future.
- To diversify learning models in order to reflect a global and inclusive educational process for every student.

The school wants to expand its scope of action to the possibilities offered by the European Community, in order to develop a curriculum that promotes an interdisciplinary and exchange with other teaching methodologies that for enrich the educational process and promote contact with the professional world.

We are also excited about participate in Multilateral Projects in order to contribute to the exchanging knowledge and improving the education of disciplines given by the school.
